

# olorado Academic Program Assessment Report for AY 2019-2020

Program:_	_General Education

Due: June 1, 2020)	Date report completed:7/17/2020
--------------------	---------------------------------

C	comp	leted	by:_	_Brian	Vand	en H	leuve	

Assessment contributors (other faculty involved):	
---	--

# **Brief statement of Program mission and goals:**

**I. Assessment of Student Learning Outcomes (SLOs) in this cycle.** Including processes, results, and recommendations for improved student learning. Use Column H to describe improvements planned for 2019-2020 based on the assessment process.

A. Which of the	B. When	C. What method	D. Who was	E. What is	F. What were the	G. What were the	H. What
program SLOs	was this	was used for	assessed?	the expected	results of the	department's	changes/improvements to
were assessed	SLO <u>last</u>	assessing the	Please fully	proficiency	assessment?	conclusions about	the <u>program</u> are planned

Comments on part I:

**II. Closing the Loop. Describe at least one data-informed change to your curriculum during the 2019-2020 cycle.** These are those that were based on, or implemented to address, the results of assessment from previous cycles.

A. What SLO(s) or other issues did you address in this cycle? Please include the outcome(s) verbatim from the assessment plan.	B. When was this SLO last assessed to generate the data which informed the change? Please indicate the semester and year.	C. What were the recommendations for change from the previous assessment column H and/or feedback?	D. How were the recommendations for change acted upon?	E. What were the results of the changes? If the changes were not effective, what are the next steps or the new recommendations?
ALL SLOs	2018	We are currently redesigning the SLOs for Gen Ed, moving to a set of skills aligned with both the state of Colorado and AAC&U	Round Tables during 2019 led to a set of new SLOs approved by Faculty Senate in April 2020 that will go into effect Fall 2021. The academic year of 2020- 2021 will be used for Facult Development around our new SLOs	New SLOs approved in April

Comments on part II:

#### GT PATHWAYS COMPETENCY: QUANTITATIVE LITERACY

Required in GT Pathways Categories:

**GT-MA1** (SLOs 1-5; and SLO 6 for Statistics courses only)

GT-SC1 (SLOs 1 & 2)

**GT-SC2** (SLOs 1 & 2)

#### Quantitative Literacy

Competency in quantitative literacy represents a student's ability to use quantifiable information and mathematical analysis to make connections and draw conclusions. Students with strong quantitative literacy skills understand and can create sophisticated arguments supported by quantitative evidence and can clearly communicate those arguments in a variety of formats (using words, tables, graphs, mathematical equations, etc.).

#### Student Learning Outcomes (SLOs)

Students should be able to:

## 1. Interpret Information (required for GT-MA1, GT-SC1 & GT-SC2)

a. Explain information presented in mathematical forms (e.g., equations, graphs, diagrams, tables, words).

#### 2. Represent Information (required for GT-MA1, GT-SC1 & GT-SC2)

a. Convert information into and between various mathematical forms (e.g., equations, graphs, diagrams, tables, words).

### 3. Perform Calculations (required for GT-MA1)

- a. Solve problems or equations at the appropriate course level.
- b. Use appropriate mathematical notation.
- c. Solve a variety of different problem types that involve a multi-step solution and address the validity of the results.

### 4. Apply and Analyze Information (required for GT-MA1)

- a. Make use of graphical objects (such as graphs of equations in two or three variables, histograms, scatterplots of bivariate data, geometrical figures, etc.) to supplement a solution to a typical problem at the appropriate level.
- b. Formulate, organize, and articulate solutions to theoretical and application problems at the appropriate course level.
- c. Make judgments based on mathematical analysis appropriate to the course level.

### 5. Communicate Using Mathematical Forms (required for GT-MA1)

a. Express mathematical analysis symbolically, graphically, and in written language that clarifies/justifies/summarizes reasoning (may also include oral communication).

## 6. Address Assumptions (required of Statistics courses only)

a. Describe and support assumptions in estimation, modeling, and data analysis, used as appropriate for the course.

GT Pathways Competency: QUANTITATIVE LITERACY

CCHE approved: June 2, 2016

# QUANTITATIVE LITERACY RUBRIC

This rubric is meant to be an <u>optional</u> course design and assessment tool. Evaluators are encouraged to assign a zero to any work sample or collection of work that does not meet level one performance criteria minimum.

	4	3	2	1
Interpret Information	Provides accurate explanations of information presented in mathematical forms. Makes appropriate inferences based on that information.	Provides accurate explanations of information presented in mathematical forms.	Provides explanations of information presented in mathematical forms, but makes errors within the explanation or inappropriate inferences based on the information.	Attempts to explain information presented in mathematical forms, but draws incorrect conclusions about what the information means.
Represent Information	Skillfully converts relevant information into an insightful mathematical portrayal in a way that contributes to a further or deeper understanding.	Competently converts relevant information into an appropriate and desired mathematical portrayal.	Completes conversion of information but resulting mathematical portrayal is only partially appropriate <i>or</i> accurate.	Completes conversion of information but resulting mathematical portrayal is inappropriate <i>or</i> inaccurate.
Perform Calculations	Calculations attempted are all successful and sufficiently comprehensive to solve the problem. Calculations are also presented elegantly (clearly, concisely, etc.) and address the validity of the results.	Calculations attempted are essentially all successful and sufficiently comprehensive to solve the problem. Calculations are also presented cohesively and address the validity of the results.	Calculations attempted are successful but only represent a portion of the calculations required to comprehensively solve the problem.	Calculations are attempted but are unsuccessful and may not be comprehensive.

GT Pathways Competency: QUANTITATIVE LITERACY

CCHE approved: June 2, 2016

	4	3	2	1
Apply and Analyze Information	Uses quantitative analysis as the basis for deep and thoughtful judgments, drawing insightful, carefully qualified conclusions from this work.	Uses quantitative analysis as the basis for competent judgments, drawing reasonable and appropriately qualified conclusions from this work.	Uses quantitative analysis as the basis for tentative, basic judgments, drawing plausible conclusions from this work.	Uses quantitative analysis as the basis for unskilled judgments, is hesitant or uncertain about drawing conclusions from this work.
Communicate Using Mathematical Forms	Uses quantifiable information in connection with a written argument or description of purpose of the work, presents it in an effective format, and explains with consistently high quality (may also include an oral argument).	Uses quantifiable information in connection with a written argument or description of purpose of the work, though data may be presented in a less than complete format or some parts of the explanation may be disjointed.	Presents a written argument but does not provide adequate quantifiable information to support or connect the argument and purpose of work.	Uses quantifiable information, but does not articulate a written argument that connects to the purpose of the work and the information.
Address Assumptions (Required of statistics courses only)	Specifically describes assumptions and provides compelling rationale for why each assumption is appropriate. Shows awareness that confidence in final conclusions is limited by the accuracy of the assumptions.	Specifically describes assumptions and provides compelling rationale for why assumptions are appropriate.	Specifically describes assumptions but attempts made to address rationale are inappropriate or ineffective.	Specifically describes assumptions but lacks rationale.

This rubric was adapted from the Association of American Colleges and Universities (AAC&U) VALUE rubrics and is also aligned with the Interstate Passport Initiative Learning Outcomes. The original VALUE rubrics may be accessed at <a href="http://www.aacu.org/value-rubrics">http://www.aacu.org/value-rubrics</a>. The Interstate Passport Initiative Learning Outcomes can be accessed at <a href="http://www.wiche.edu/passport/learningOutcomesCriteria">http://www.wiche.edu/passport/learningOutcomesCriteria</a>.
