The Medical Laboratory Sciences or Medical Technology concentration prepares the student for application and entry to a one-year internship program at a hospital. A student must have a bachelor's degree plus the internship training to be allowed to sit for the state licensing exam. The student will obtain their bachelor's degree in biology from CSU-Pueblo upon the successful completion of all CSU-Pueblo coursework.

The three Medical Lab Science (Medical Technology) programs based in Colorado include Parkview Hospital in Pueblo, Colorado Center for Medical Lab Science in Denver (operated through Metro State University), and Denver Health School of Medical Lab Sciences.

There are two different options of study for CSU-Pueblo students:

- **3 + 1 Option-** CSU-Pueblo on-campus required courses are completed in the first three years. Internship is applied for during the student's third year with the internship serving as the senior year. Student continues enrollment at CSU-Pueblo and eligibility for financial aid during internship. Bachelor's degree is conferred upon successful completion of internship.
- **4 + 1 Option-** Internship is applied for during the student's senior year and a bachelor's degree in biology is completed and awarded before beginning the internship.
