

Benefits of Enrollment

Mobile applications have become as important as corporate websites in many industries. Apps increase customer engagement, provide a valuable interface for customer service and support, and unique opportunities for promotion in for-profit, governmental, and non-profit organizations alike. The Mobile App Development Certificate is intended for individuals who are seeking to expand their skills to include the development of iOS iPhone/iPod Touch/iPad/Android applications. This certificate program will cover the development of a mobile application including design, coding, testing, and debugging in a hands-on environment.

The app development certificate is designed and offered in collaboration with the faculty of the Malik and Seeme Hasan School of Business.

Southern Colorado's Best Value in Mobile App Development Training and Education

Mobile App Development Certificate Program

Invest in Your Future

Course Titles

The App Development series includes:

- Beginning Apple App Development
- Advanced Apple App Development
- Beginning Android App Development
- Advanced Android App Development

This four-course series is designed and taught by our highly qualified instructor, Professor Joey Cho. Dr. Cho's cutting edge experience and training with both Apple and Android environments ensures that you will work with the latest in mobile application development tools.

Prerequisite Knowledge

A successful student would mostly likely have a programming and/or Information Technology (IT) background. Some Object Oriented Programming experience is highly recommended.

Registration Information

To register for the next course, visit at:

Faculty Credentials

Dr. Juyun (Joey) Cho is an associate professor of Computer Information Systems in the Hasan School of Business at Colorado State University-Pueblo.

He received his B.E. and M.E. degrees in Computer Engineering in Korea along with his B.S. and M.S. in Computer Science and Ph.D. in Management Information Systems from Utah State University. Prior to joining his Ph.D. program, he worked in industry for 10 years as a software engineer and project manager, completing numerous small and large-scale projects related to the public safety solutions, e-commerce systems, and computer simulated systems for mining, petroleum drilling, and maritime cranes. His research interests and expertise are on the Scrum method in agile software development, e-commerce systems, and web-based technologies.
